

Multiple Speakers and Collabs

[image4.png](#)

- Time them chronologically
 - The gap between the two speakers shouldn't be too far away from each other in terms of how many lines they are separated in aegisub.
- As much as possible, make sure that both lines *appear and disappear at the same time*.
 - If one of the speakers ends at least 500ms earlier (including lead out), then you may cut the line's timing there.
 - No matter what, the lead-ins of both speakers should relatively stay the same and appear together.
