

Tips and Shortcuts

Keyboard Shortcuts

- A - Slide the audio bar to the Left.
- S - Plays the audio entirely.
- D - Plays the last 500ms of the audio.
- F - Slide the audio bar to the right.
- G/Enter - Commit the timing for the line
- Z - Go to the previous line
- X - Go to the next line
- C - Add a set amount of lead-in to the timing (default is 300ms)
- V - Add a set amount of lead-out to the timing (default is 300ms)

Changing Settings

[u2slmvvd.png](#)

You can change the amount on the settings (Alt+O)

You can check “Snap markers by default” to easily manage blinking/overlapping.

Timing Post Processor

You can use the “Timing Post Processor” to automatically fix and clean out missed **blinkings**.

However, *this does not work if you are working with a collab stream* where multiple people are speaking.
